PROFESSIONAL SUMMARY

Data Analyst with hands-on experience across the modern analytics workflow, spanning data preparation, relational modeling, and the deployment of interactive analytics applications. Proficient in SQL, Python, and Power BI to transform raw datasets into KPI-driven dashboards and actionable business insights.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering (Data Science) 2022–2026
Sai Vidya Institute of Technology, Bengaluru CGPA: 8.81

EXPERIENCE

Data Analytics Intern (VTU Academic Training Program) **Swizosoft Pvt. Ltd. | Feb 2026 – May 2026**

- Developed two end-to-end analytics applications, including an E-Commerce Business Intelligence Platform and an Intelligent Anomaly Monitoring System, using Python, SQL, Power BI, and Streamlit.
- Implemented data processing workflows, interactive dashboards, and automated business insight generation to analyze customer behavior, anomaly detection, and operational KPIs.
- Worked in a mentor-guided development environment, participating in project reviews, solution discussions, and iterative feature development.

TECHNICAL SKILLS

- **Databases & Querying:** SQL (Advanced SQL, Joins, Window Functions, CTEs), MySQL, Microsoft SQL Server, Google BigQuery.
- **Business Intelligence (BI):** Power BI, DAX, Power Query, Looker Studio, Tableau, Advanced Excel, Dashboard Design & Development.
- **Programming:** Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly).
- **Analytics & Modeling:** Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Design, Business Analytics.
- **Tools & Deployment:** Git / GitHub, Streamlit, dbt (Data Build Tool), GitHub Actions

PROJECTS

E-Commerce Business Intelligence & Funnel Analytics Platform

Live Demo | *Link*

Python, Streamlit, Pandas, Plotly, Data Modeling

- **Built** an end-to-end e-commerce analytics platform using Python & Streamlit by integrating 5 relational datasets into a unified business intelligence application.
- **Designed** interactive dashboards featuring sales, profitability, return analysis, geographic performance, KPI monitoring, and what-if profit scenario analysis to support business decision-making.
- **Programmed** a multi-stage customer funnel analysis module that identified checkout abandonment and customer drop-off across the purchasing journey, highlighting a 61.3% abandonment rate at the checkout stage.
- **Created** a rule-based **Insight Engine** that automatically generated contextual business insights from KPI trends, return patterns, and product performance.

BMTC Transit Accessibility & Service Gap Analysis

Link

Python, GeoPandas, Power BI, DAX, SQL

- **Built** a geospatial transit analytics dataset by combining 4,655 bus stops, 4,009 routes, and population data using Python and GeoPandas for accessibility analysis.
- **Matched** bus stops to route paths using GeoPandas spatial joins & created custom metrics such as Gap Score to compare demand with service availability.
- **Developed** an interactive Power BI dashboard to identify 627 underserved bus stops, helping compare service quality across routes and locations.

Intelligent Anomaly Monitoring System

Live Demo | *Link*

Python, Streamlit, Statistical Analytics

- **Constructed** a statistical anomaly detection pipeline by combining LSTM predictions with Z-score analysis to identify abnormal behavior in time-series sensor data.
- **Designed** a Streamlit monitoring dashboard to visualize anomaly trends, severity levels, system health, KPI Tracking and statistical summaries for easier monitoring.

AdventureWorks Sales & Customer Analytics

Link

Power BI, DAX, Power Query, Data Modeling

- **Built** a Power BI dashboard by cleaning and transforming multiple CSV datasets in Power Query and organizing them into a Star Schema data model.
- **Formulated** DAX measures and KPI cards to track revenue, profit, orders, and returns, and added a What-If analysis for pricing scenarios.
- **Designed** interactive dashboards to analyze sales, products, customers, and regional performance, highlighting key business metrics such as ₹24.9M revenue and a 2.2% return rate.

CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate | PL-300** (Microsoft) 2026
- **The Complete SQL Bootcamp** (Udemy) 2025
- **MongoDB NoSQL Developer** (Infosys Springboard) 2025

VOLUNTEERING

Member, Utkarsha Data Science Club SVIT (2024–2026)
Organized and supported technical events, coding activities, and workshops to strengthen departmental analytics culture.

ACHIEVEMENTS

- **1st Place -** Dept. Of CSE (Data Science) – MAJOR PROJECT EXPO 2025
- **1st Place -** SVIT Inter-Branch Football Competition
